[01] WHO WE ARE

Pay-at-table software, built for Jordan's restaurants.

Guests scan the QR code on the table, see the itemised bill, split it, tip and pay from their own phone, with no app to download. The restaurant gets a live view of every table, an exact record of every payment, and the sale posted back to its POS.

> **Payli sits beside the payment, never in it.**

Amman

Built and based in Jordan

Beta

Closed beta, choosing our first restaurants

JOD 0.000

held by Payli, ever. Payments settle straight to the restaurant's own merchant account.

PAYLI IS

- ✓ Pay-at-table software for restaurants and cafés
- ✓ One QR code per table, opening the live bill
- ✓ A live floor and transactions dashboard
- ✓ A double-entry ledger and a sync back to your POS
- ✓ Bilingual for guests: English and العربية
- ✓ Priced per venue, with no hardware

PAYLI IS NOT

- ✗ A bank or a licensed payment company
- ✗ Ever holding, pooling or paying out money
- ✗ A replacement for your POS
- ✗ An app your guests must install
- ✗ Hardware you have to buy
- ✗ Taking a fee on tips

[02] THE CORE CHALLENGE

The last five minutes of dinner cost every table time, staff and patience.

The meal is over, but the table isn't free. Everyone waits on the same few steps: get the check, bring the machine, work out who owes what.

FOR YOUR GUESTS (01)

Waiting to be allowed to leave

Catching a server's eye, waiting for the check, waiting for the card machine, then doing arithmetic at the table.

WITH PAYLI They pay from their own phone the moment they're ready, and split it fairly in a few taps.

FOR YOUR TEAM (02)

Busy hands at the busiest moment

Printing checks, walking terminals across the room and splitting bills by hand while new tables are waiting.

WITH PAYLI The floor board shows which tables are paying and paid, so staff stay on the floor.

FOR YOUR BUSINESS (03)

Tables held, slips to reconcile

Seats stay occupied after the meal ends, and the day closes with a pile of slips to match against the bank.

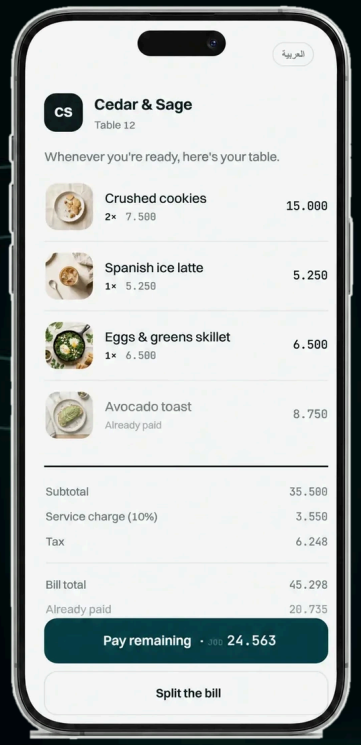

WITH PAYLI Every bill, split and tip is recorded to the fils and exports as one clean file.

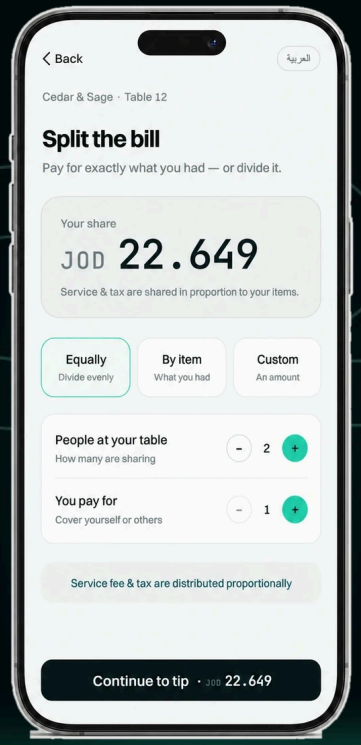

So.

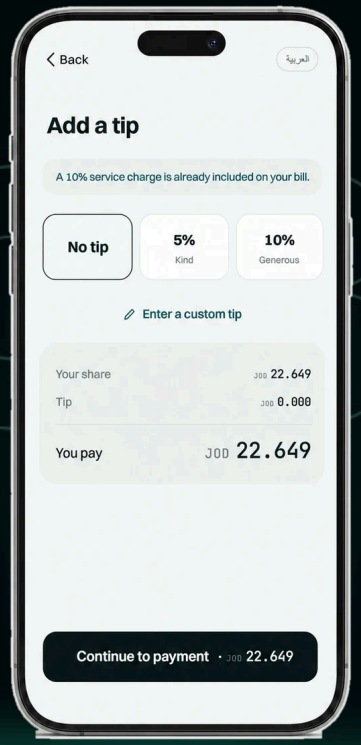

Tables stay occupied, the team stays busy and the numbers arrive late. Payli moves the payment to the guest's phone and the record to your dashboard.

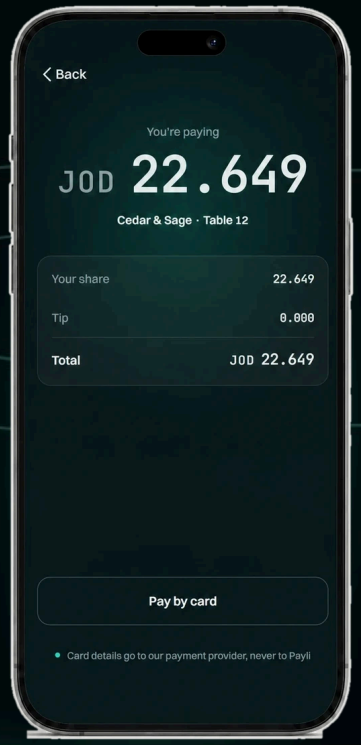

[03] HOW IT WORKS

Four steps from "we're done" to paid.

01 · SCAN

The bill opens itself

One QR per table opens the itemised bill in the browser, in English or Arabic.

02 · SPLIT

Evenly, by item or any amount

Service and tax follow the items, and nobody can pay twice.

03 · TIP

A thank-you in one tap

5%, 10%, custom or none. The full tip goes to the restaurant.

04 · PAY

On the provider's secure page

Visa or Mastercard, plus Apple Pay and Google Pay where enabled.

[04] AFTER THEY PAY

When the last share is paid, the sale lands in your POS.

ON THE PHONE

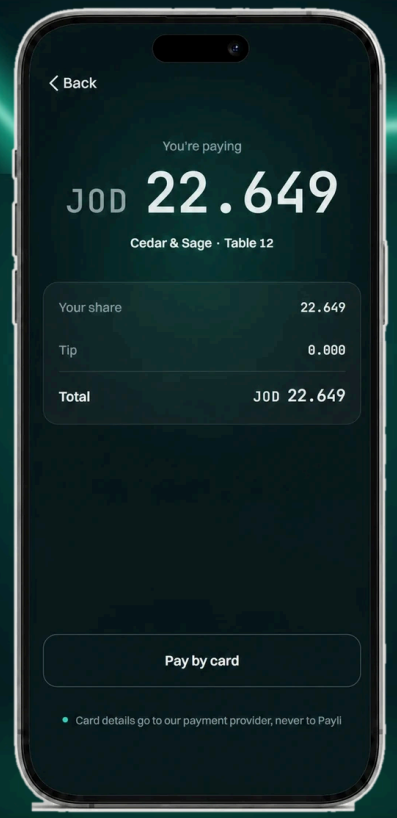

A clear confirmation

Each guest sees their payment confirmed, with what they paid and the tip they left.

FOR THE GUEST

A rating while it's fresh

One to five stars and a comment, landing in your dashboard right away.

IN YOUR POS

The sale, posted for you

Items, tax, service, tip and tender. Only a fully paid table is posted, so your POS never sees half a bill.

IN YOUR DASHBOARD

A receipt for every payment

View or print a receipt for any payment, refund with a reason, and export the day.

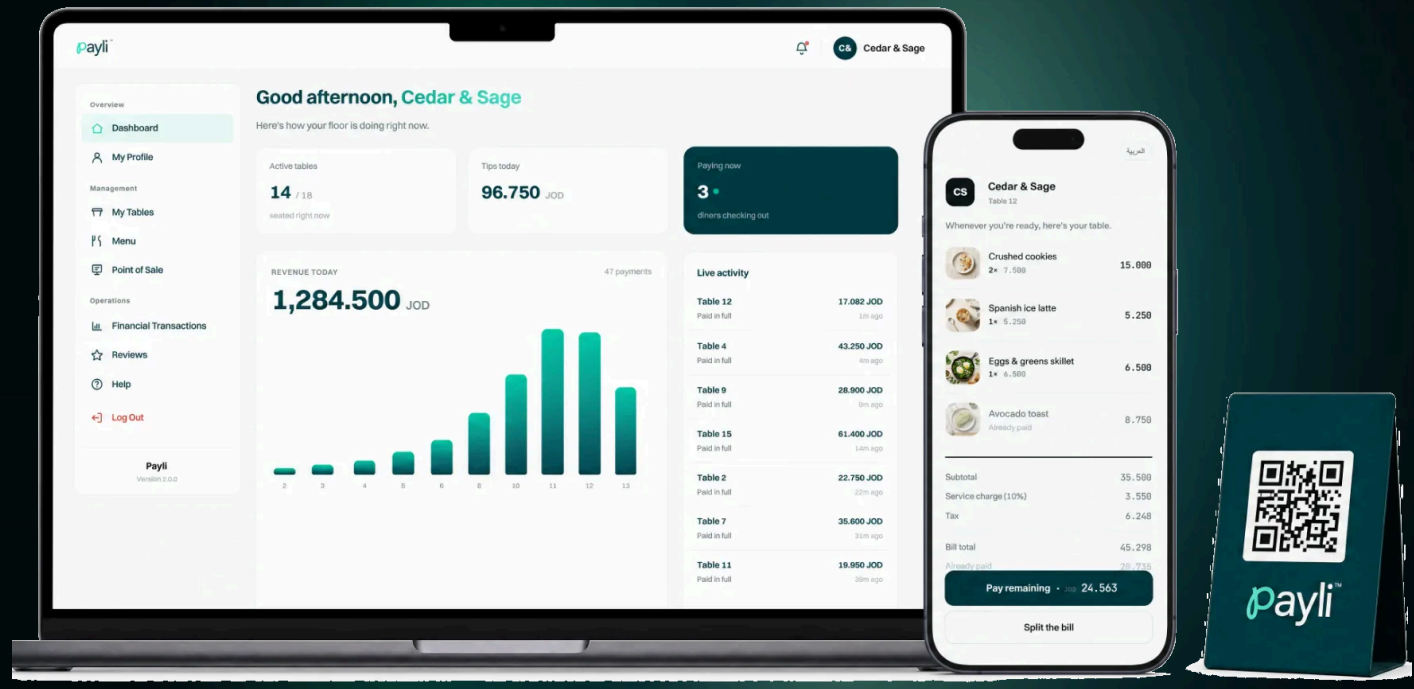

A split table stays open until the last guest pays. No re-keying at the till.

[05] FOR RESTAURANTS AND CAFÉS

One dashboard runs the floor, the payments and the close.

Live floor	Bill open, paying now, paid: readable from two metres, with QR codes for every table.
Transactions	Table, bill, tip, total, method and time. Receipts, refunds with a reason, CSV export.
Reconciliation	A double-entry ledger exact to the fils, ready to match your provider's settlement.
Menu manager	Imported from your POS where supported, with Arabic item names.
POS sync	The sync status of every paid bill, with a retry button.
Ratings	Every rating and comment, with its table and time.

- Runs in any web browser

- Dashboard in English · guest flow in English and العربية

[06] PAYLI IN NUMBERS

The numbers that matter at the table are small ones.

These are product facts, not usage figures: Payli is in closed beta, so there are no customer metrics yet.

4
steps from scan to paid

0
apps for guests to download

0
fils Payli fee on tips

.000
every amount in JOD, to three decimals

2
languages for every guest

15 min
to see it on your own phone

[07] WHAT CHANGES ON YOUR FLOOR

Faster tables, freer staff, numbers that close.

Every outcome comes from something the product does. Ask us to show any of them in the demo.

01

Tables free up sooner

Guests pay the moment they're ready, instead of waiting for the check and the card machine.

4 steps

QR → LIVE BILL → SPLIT → PAY

02

Staff stay on the floor

No terminals walked across the room. The board shows who has paid.

LIVE FLOOR BOARD

03

Splitting stops being a problem

Service and tax follow the items; nobody pays twice.

PROPORTIONAL, TO THE FILS

04

Tips at the right moment

Asked while the service is fresh; the full tip goes to the restaurant.

NO PAYLI FEE ON TIPS

05

The day closes exact

Every bill, split, tip and refund, ready to match your provider's settlement.

DOUBLE-ENTRY LEDGER · CSV

06

No re-keying at the till

The fully paid sale goes back to your POS with items, tax, tip and tender.

POS CONNECTOR · IN DEVELOPMENT

07

You hear about every table

Ratings and comments arrive while the guest is still there.

1–5 STARS AFTER PAYMENT

[08] ESTIMATE IT WITH YOUR NUMBERS

Work out what the last five minutes are worth to your venue.

YOUR VENUE	EXAMPLE	YOURS
A · Tables	20	
B · Seatings per table on a busy night	2	
C · Minutes saved per seating Your estimate of the wait between "we're done" and "we've paid"	5 min	
D · Average seating length	75 min	
E · Average bill per table	JOD 35	
F · Busy nights per month	12	
Extra seatings per month A × B × C ÷ D × F	32	
Revenue capacity per month Extra seatings × E	JOD 1,120	

IN THE EXAMPLE

TABLE TIME FREED PER BUSY NIGHT

3.3 h

5 minutes × 2 seatings × 20 tables = 200 minutes

EXTRA SEATINGS THAT TIME COULD HOLD

32 / month

200 ÷ 75 minutes × 12 busy nights

REVENUE CAPACITY OF THOSE SEATINGS

JOD 1,120

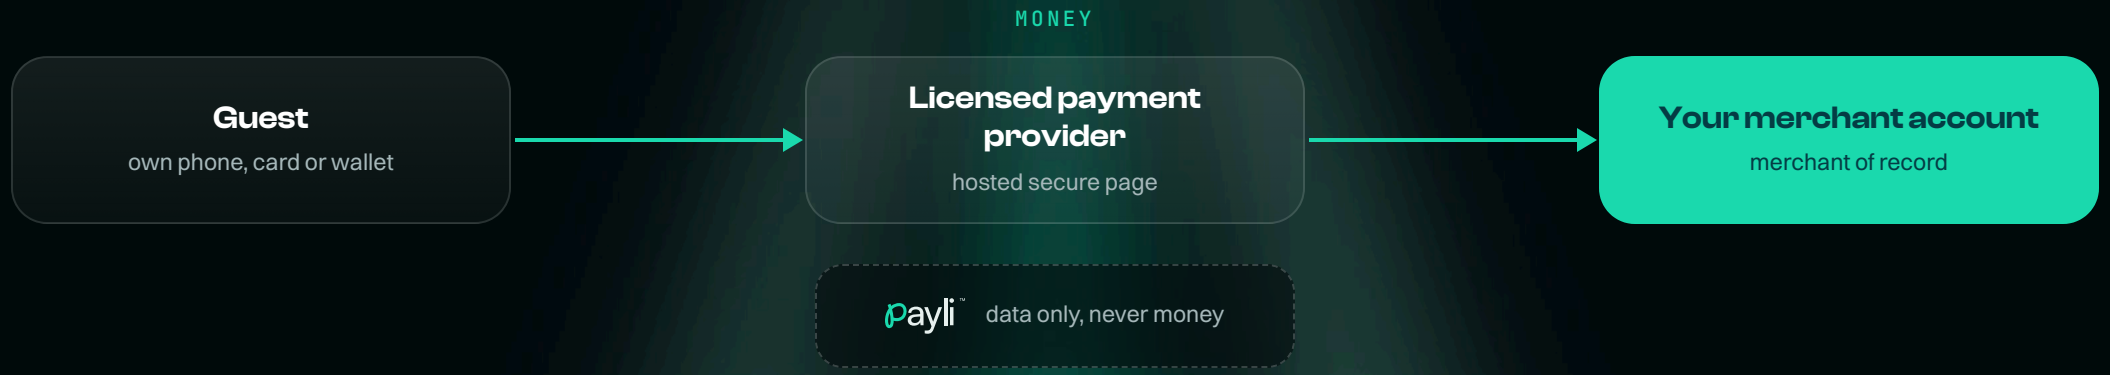

32 seatings × JOD 35 average bill

An illustration built only from the numbers entered. It is capacity, not a forecast: it becomes revenue only on nights when guests are waiting for a table. Payli has no measured results from live restaurants yet. Your Payli contact can run your numbers live with you.

[09] HOW MONEY MOVES

Payli never holds your money.

Payments settle straight to your own merchant account. You stay the merchant of record.

Card details never touch Payli

Entered on the provider's own secure page. Payli never sees or stores the full card number or security code; 3-D Secure applies where the bank requires it.

Refunds come from your provider

Your team starts a refund in the dashboard; the provider returns it to the guest's original card. Payli never funds or holds a refund.

Fees invoiced, never deducted

Payli invoices its own fees separately and takes no fee on tips. Your provider's card fees follow your merchant agreement.

Honest about the beta: Payli is software, not a bank or a licensed payment company; the provider holds the licence. Payli hasn't yet been independently audited or certified, including against PCI DSS, and doesn't claim to be.

[10] INTEGRATIONS

Works alongside your POS and payment provider, and we're clear about what's ready.

AQUA POS

IN DEVELOPMENT

Built to import your menu and post every fully paid table back as a sale. Sale posting is being tested on AQUA's test server.

Foodics

IN DEVELOPMENT

Reads the live order on each table. Staff confirm the paid order in the Foodics cashier, using Foodics' own pay-at-table flow.

POSRocket

PLANNED

Planned together with Foodics, which acquired POSRocket.

Oracle MICROS Simphony

PLANNED

Designed to post each fully paid table as a check with its tender and tip.

A licensed payment provider in Jordan

IN TESTING

Guests pay on the provider's own hosted page, and the money settles to the restaurant's merchant account. We confirm which providers are available for your venue in the demo.

Visa · Mastercard · Apple Pay* · Google Pay*

* Where the provider enables them, on its own secure page. CliQ isn't supported.

POINT OF SALE
A POS Payli connects to, or one you'd like us to

PAYMENTS
A merchant account with a licensed provider

DEVICES
Any tablet, phone or laptop with a browser

TABLES
A printed QR code for each table

Status as of November 2026. In development: being built and tested against the vendor's test system; not yet live at any restaurant. Planned: not built yet.

[11] GETTING STARTED

From a 15-minute demo to your first paid table.

01
See it on your phone
A 15-minute demo of the guest's side and yours.

02
Check the fit
We confirm your POS, payment provider and what's ready for you.

03
Set up your venue
We create your venue, connect your POS and bring in your menu.

04
A QR on every table
Add your tables and print a QR code for each one.

05
Brief the team
Floor board, receipts and refunds take minutes. Then your first tables pay.

0 Hardware to buy	**0** Payli fee on tips	**Invoiced** Fees billed separately, never deducted	**Per venue** No price list; walked through in the demo

[12] BEFORE YOU ASK

The questions owners ask, answered plainly.

Is Payli live yet?

Payli is in closed beta in Amman and talking to its first restaurants. No restaurant is live yet, and we say plainly what works today and what's coming.

Does Payli hold our money?

Never. A licensed payment provider processes each payment and settles it into your own merchant account. You're the merchant of record.

When do we receive our money?

Straight from your payment provider, on the schedule in your merchant agreement. Payli doesn't set or control that schedule.

Does Payli replace our POS?

No. The bill comes from your POS, and when the table is fully paid the sale is posted back to it.

Do guests need an app?

No. The QR opens the bill in the browser: no app, no account, no Wi-Fi password, and no name, email or phone number to pay.

Who handles refunds and chargebacks?

The restaurant, as the merchant of record. Your team starts a refund in the dashboard; your provider returns it to the guest's original card.

How are card details protected?

They're entered on the provider's secure page, so Payli never sees or stores the full card number or security code.

Does it work in Arabic?

The guest flow is in English and العربية, switched with one tap, with amounts in JOD to three decimals. The restaurant dashboard is in English today.

Thank you.

[13] NEXT STEP

Bring Payli to your floor.

Book a 15-minute demo and see Payli on your own phone, with your own menu. We're choosing a small first group of restaurants in Amman.

payli.io

BASED IN
Amman, Jordan

Payli is software for restaurants, built by a company registered in the Hashemite Kingdom of Jordan. It never holds or moves money: payments are processed by licensed payment providers and settle directly to each restaurant's own merchant account. Product screens use demo data; Cedar & Sage is a fictional venue. Statuses as of November 2026.
