

Payli™

Pay at Table and the Order Pager

Product and solution brochure

Edition November 2026

On the phone: the Order Pager, in development and not yet live at any venue. Cedar & Sage is a fictional venue used for illustration.

Two waits. One phone.

At the table. The meal is over and you are ready to go. But the bill has to be asked for, printed, carried, split by hand and paid on a terminal that is on another table.

At the counter. You have ordered, and you stand and wait because you do not know how long it will take. Or you sit down with a plastic buzzer: hardware to buy, charge, clean and replace.

Meanwhile, for the team. Every bill run and terminal run takes a member of staff off the floor at the busiest moment.

At the close. Payments, tips and POS sales are counted separately and reconciled by hand. Numbers that should match do not.

Two products. Pay at Table is in closed beta. The Order Pager is in development and not yet live at any venue.

Every guest already carries a better device than any restaurant could hand them. Payli puts the bill, the split, the tip and the order alert on it, with nothing to install, and gives the restaurant the record.

You scan.
You sit down.

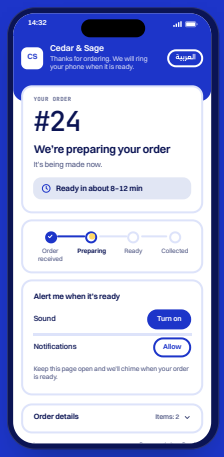

No app, no account, no phone number. Either way, it starts with a QR code and your phone's browser, in English or Arabic.

At the counter Order Pager, in development

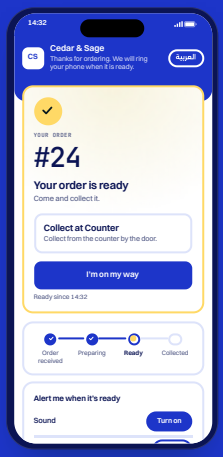

You arrive · Scan · Follow · Ring · Collect

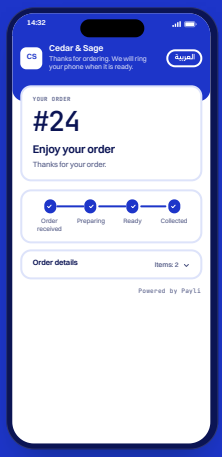

Scan the QR at the counter.

Follow your order from your seat.

"Your order is ready." Tap I'm on my way.

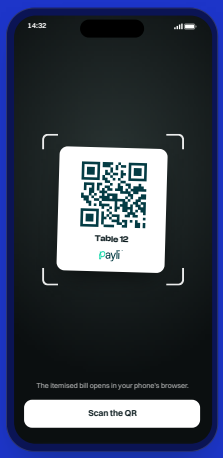

Collect it. "Enjoy your order."

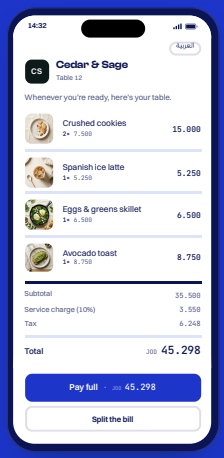

Staff press Ready & ring; your phone shows where to collect and chimes if you turned sound on. The counter sees that your phone received the alert.

At the table Pay at Table, closed beta

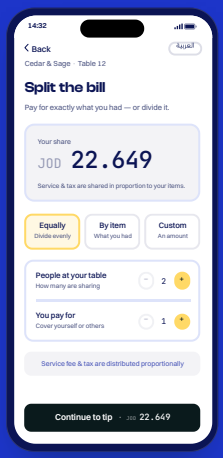

Scan · Bill · Split · Tip · Pay

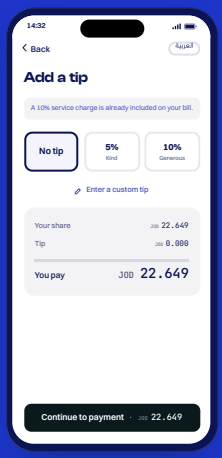

Scan the QR on your table.

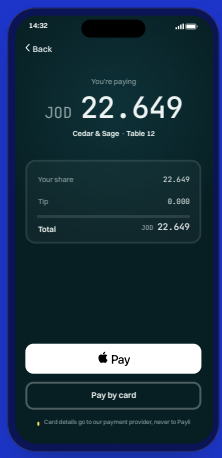

The itemised bill, in JOD to three decimals.

Evenly, by item, or any amount.

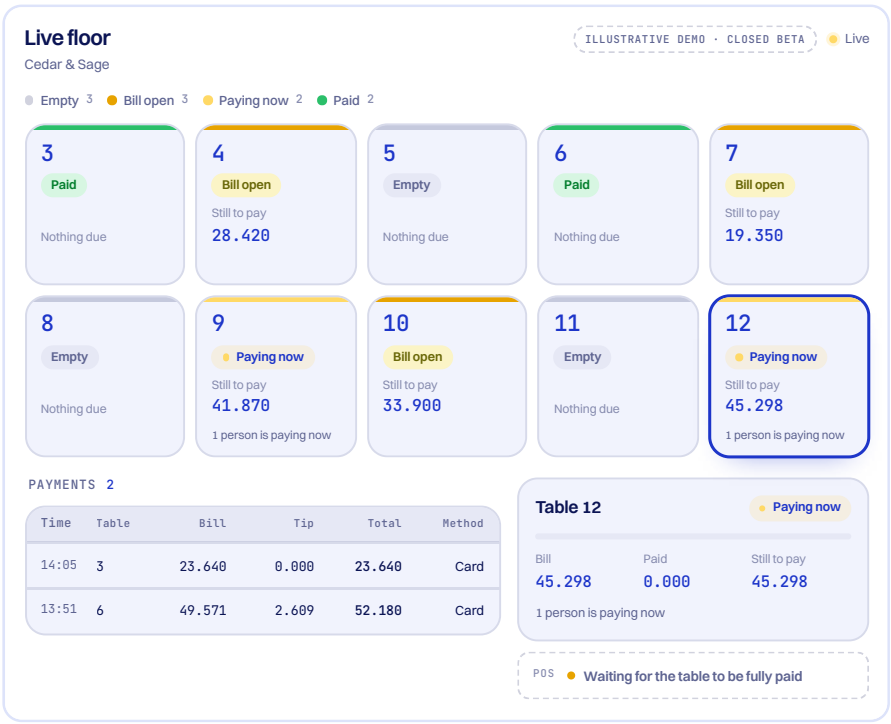

5%, 10%, a custom amount, or none.

By card, on the provider's own page.

Meanwhile, on your side.

Your team works from one dashboard in a web browser, on any tablet, phone or laptop. It is in English today. Your guests' screens are in English and Arabic.

Live floor

Every table shows one of four states: Empty, Bill open, Paying now, Paid.

Transactions

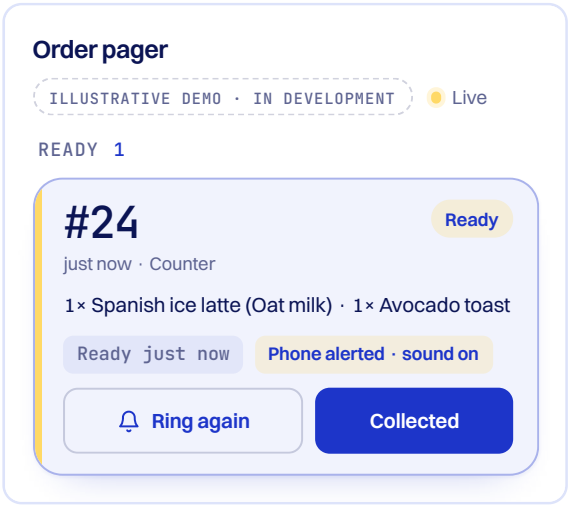

Each payment with its table, bill, tip, total, method and time. Print a receipt, refund from the same screen, export the day as a spreadsheet.

Ledger

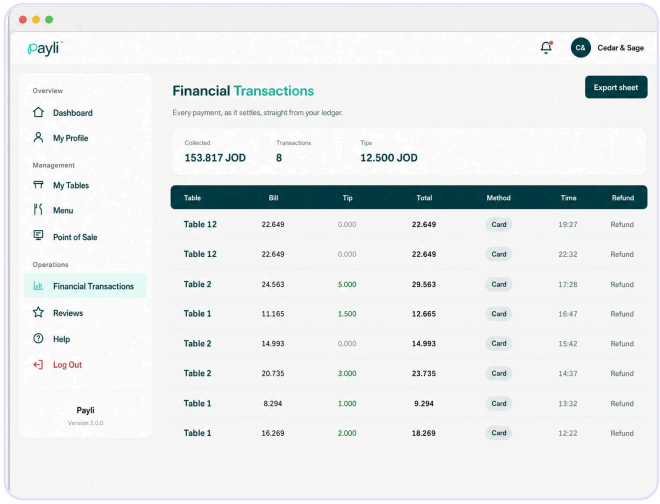

Double-entry and append-only, exact to the fils. Tips are shown apart from sales.

POS posting

Only a fully paid bill is posted to the POS. Partial payments never are.

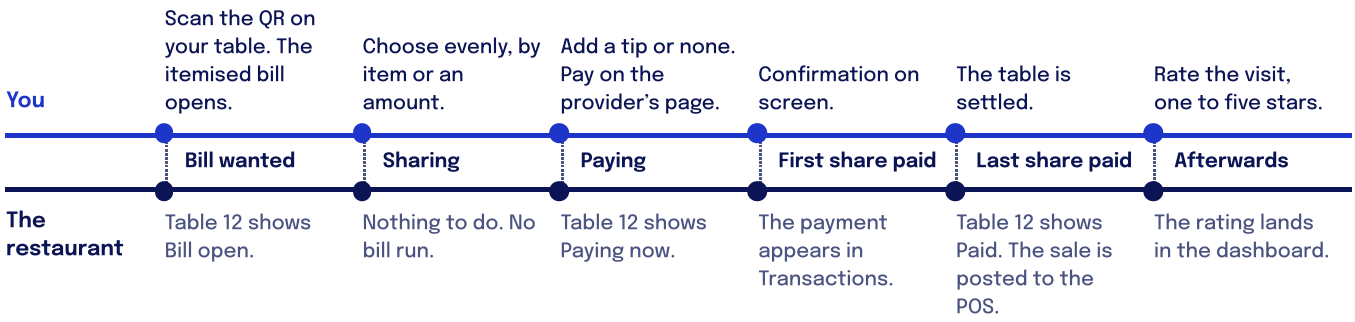

At the counter. The Order Pager board: Start, Ready & ring, Ring again, Collected. It reports that the phone received the alert, never that someone heard it. In development; not yet live at any venue.

At the close. Financial Transactions in the Restaurant Dashboard, closed beta, as the product looks today. Above: the live floor as the demo draws it.

One visit, seen from both sides.

Pay at Table Closed beta

Order Pager In development; not yet live at any venue

What it does	What it means for the room
Guests pay when they are ready	Tables free up sooner at the end of the meal
No bill run and no terminal run	The team stays on the floor
Split evenly, by item or any amount	Split bills without disputes; nobody pays twice
A tip step on every payment	Tips recorded cleanly, apart from sales; no Payli fee on tips
An append-only ledger, exact to the fils	An exact close; only fully paid bills in the POS
Settlement to your own merchant account	Your money stays yours; fees are invoiced, never deducted
Phones for guests, a browser for staff	Nothing to install, nothing to buy
English or Arabic on every guest screen	Guests are served in their language
A rating and a comment after paying	Feedback while it matters, in the dashboard
Order Pager, in development: the guest's phone is the pager	No buzzers to buy, charge or lose; guests can sit down instead of hovering at the counter
Order Pager, in development: your logo, colours and wording; estimates staff can change	Your brand on the guest's phone, and honest wait times

Try it on your own phone.

Ask us for 15 minutes. We walk you through the guest's side and yours, on your own menu, and tell you what is ready for your venue. There is no published price list; pricing depends on the venue and is covered in the walkthrough.
