The bill comes to the table. Nobody waits for it.

Pay-at-table software for restaurants in Jordan. Guests scan the QR on the table, see the itemised bill, split it, tip and pay from their own phone. Your floor, your POS and your books stay exact to the fils.

AT A GLANCE

4 steps for the guest: scan, split, tip, pay	**0** apps to download, accounts to create, hardware to buy
0 fils Payli fee on tips. The full tip goes to the restaurant	**.000** every amount in JOD to three decimals, never rounded

Payli is in closed beta in Amman and is choosing its first restaurants. No restaurant is live yet. These are product facts, not usage figures.

FIG. 1 — THE LAST FIVE MINUTES, WITHOUT THE WAIT. ILLUSTRATION, DEMO DATA.

CEDAR & SAGE IS A FICTIONAL VENUE

CHAPTER ONE — THE PROBLEM

01

The last five minutes of dinner are the slowest part of it.

The meal is over, but the table isn't free. Everyone waits on the same few steps: get the check, bring the machine, work out who owes what.

i

FOR YOUR GUESTS

Waiting to be allowed to leave

Catching a server's eye, waiting for the check, waiting for the card machine, then doing arithmetic at the table.

WITH PAYLI

They pay from their own phone the moment they're ready, and split it fairly in a few taps.

ii

FOR YOUR TEAM

Busy hands at the busiest moment

Printing checks, walking terminals across the room and splitting bills by hand while new tables are waiting.

WITH PAYLI

The floor board shows which tables are paying and paid, so staff stay on the floor.

iii

FOR YOUR BUSINESS

Tables held, slips to reconcile

Seats stay occupied after the meal ends, and the day closes with a pile of slips to match against the bank.

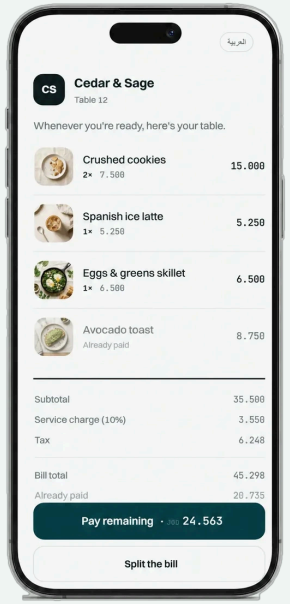

WITH PAYLI

Every bill, split and tip is recorded to the fils and exports as one clean file.

CHAPTER TWO — HOW IT WORKS FOR GUESTS

02

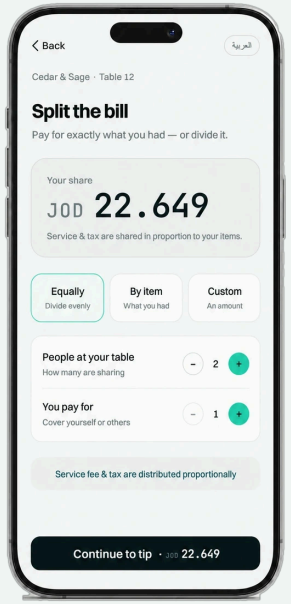

Four steps from "we're done" to paid, with no app to download.

01 · SCAN

The bill opens itself

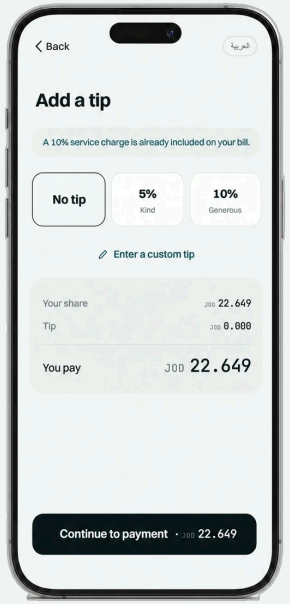

One QR per table opens the itemised bill in the phone's browser, in English or Arabic.

02 · SPLIT

Evenly, by item or any amount

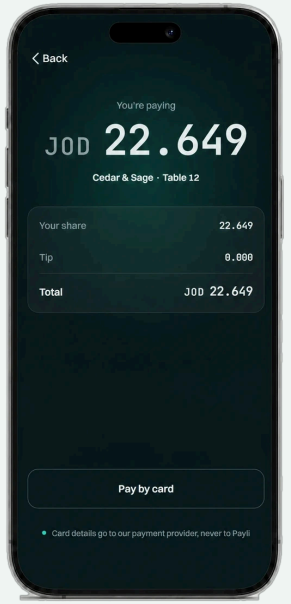

Service and tax follow the items, so every share is fair, and nobody pays twice.

03 · TIP

A thank-you in one tap

5%, 10%, custom or none. Payli takes no fee on tips; the full tip goes to the restaurant.

04 · PAY

On the provider's secure page

Visa or Mastercard, plus Apple Pay and Google Pay where the provider enables them.

CHAPTER THREE — AFTER THEY PAY

When the last share is paid, the sale lands in your POS with no re-keying.

A split table stays open until the last guest pays. Then the whole sale goes back to your POS with its items, tax, service, tip and tender.

ON THE PHONE

A clear confirmation

Each guest sees their payment confirmed, with what they paid and the tip they left.

IN YOUR POS

The sale, posted for you

Only a fully paid table is posted, so your POS never sees half a bill.

IN YOUR DASHBOARD

A receipt for every payment

View or print a receipt for any payment, refund with a reason, export the day.

FOR THE GUEST

A rating while it's fresh

One to five stars and a comment, landing in your dashboard right away.

03

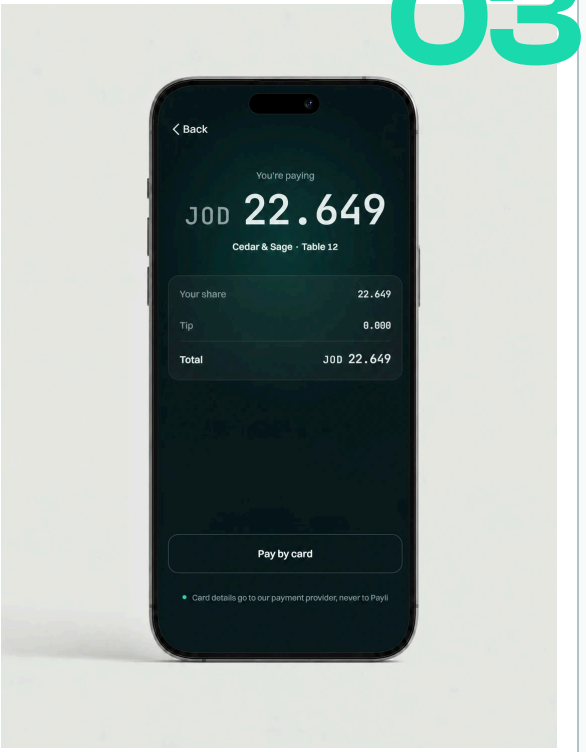

FIG. 2 — THE PAYMENT STEP. DEMO DATA.

CHAPTER FOUR — FOR RESTAURANTS AND CAFÉS

04

Turn tables sooner. Close the day exact.

Live floor	Bill open, paying now, paid: readable from two metres, with QR codes for every table.
Transactions	Table, bill, tip, total, method and time. Receipts, refunds with a reason, CSV export.
Reconciliation	A double-entry, append-only ledger exact to the fils, ready to match your provider's settlement.
Menu manager	Imported from your POS where the integration supports it, with Arabic item names.
POS sync	The sync status of every paid bill, with a retry button.
Ratings	Every rating and comment, with its table and time.

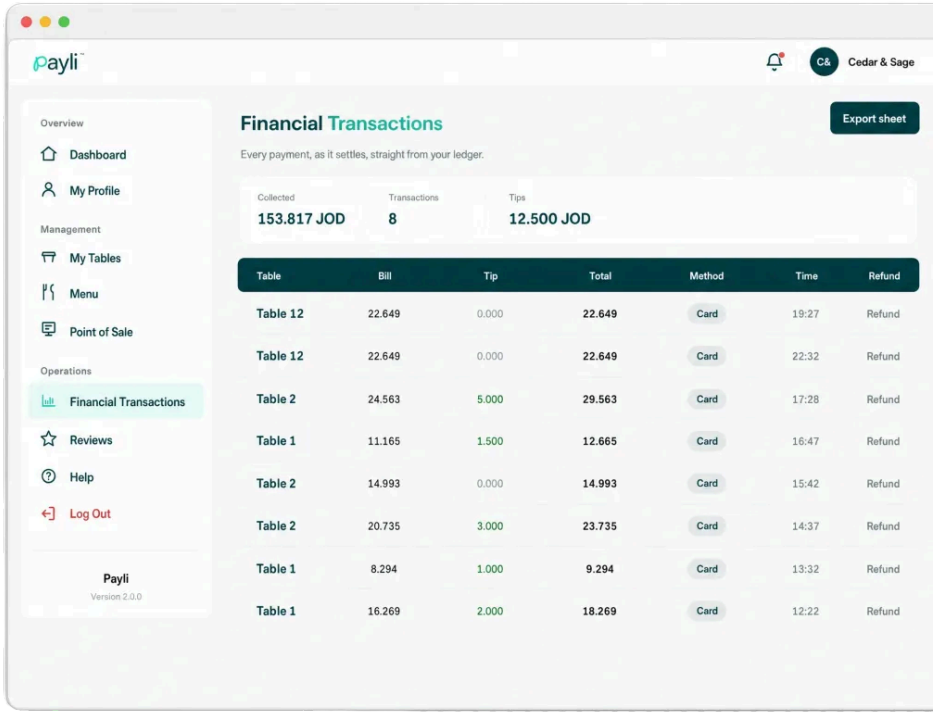

FIG. 3 — FINANCIAL TRANSACTIONS, RESTAURANT DASHBOARD (ENGLISH). DEMO DATA.

CHAPTER FIVE — WHAT CHANGES ON YOUR FLOOR

05

Faster tables, freer staff, numbers that close.

01 **Tables free up sooner**

Guests pay the moment they're ready, instead of waiting for the check and the card machine.

QR → LIVE BILL → SPLIT → PAY

02 **Staff stay on the floor**

No terminals walked across the room, no hand-split checks. The board shows who has paid.

LIVE FLOOR BOARD

03 **Splitting stops being a problem**

Evenly, by item or a custom amount. Service and tax follow the items; nobody pays twice.

PROPORTIONAL SPLIT, TO THE FILS

04 **Tips at the right moment**

Asked while the service is fresh. The full tip goes to the restaurant.

NO PAYLI FEE ON TIPS

05 **The day closes exact**

Every bill, split, tip and refund, ready to match against your provider's settlement.

DOUBLE-ENTRY LEDGER · CSV

06 **No re-keying at the till**

The fully paid sale goes back to your POS with items, tax, service, tip and tender.

POS CONNECTOR · IN DEVELOPMENT

07 **You hear about every table**

Ratings and comments arrive while the guest is still there to talk to.

1–5 STAR RATING AFTER PAYMENT

08 **Nothing to install or buy**

Guests use their own phones; your team uses the dashboard in a browser.

NO APP · NO HARDWARE

WORKSHEET — ESTIMATE IT WITH YOUR NUMBERS

Work out what the last five minutes are worth to your venue.

YOUR VENUE	EXAMPLE	YOURS
A · Tables	20	
B · Seatings per table on a busy night	2	
C · Minutes saved per seating Your estimate of the wait between "we're done" and "we've paid"	5 min	
D · Average seating length	75 min	
E · Average bill per table	JOD 35	
F · Busy nights per month	12	
Extra seatings per month A × B × C ÷ D × F	32	
Revenue capacity per month Extra seatings × E	JOD 1,120	

IN THE EXAMPLE

TABLE TIME FREED PER BUSY NIGHT

3.3 h

5 minutes × 2 seatings × 20 tables = 200 minutes

EXTRA SEATINGS THAT TIME COULD HOLD

32 /month

200 ÷ 75 minutes × 12 busy nights

REVENUE CAPACITY OF THOSE SEATINGS

JOD 1,120

32 seatings × JOD 35 average bill

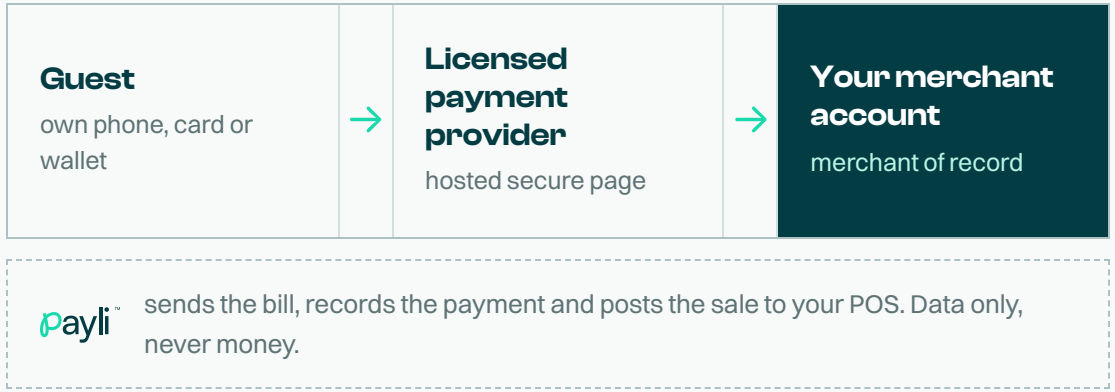

An illustration built only from the numbers entered. It is capacity, not a forecast: it becomes revenue only on nights when guests are waiting for a table. Payli has no measured results from live restaurants yet.

CHAPTER SIX — HOW MONEY MOVES

06

Payli is software. It never holds your money.

Guests pay through a licensed payment provider, and the money settles directly into the restaurant's own merchant account. The restaurant is the merchant of record.

i. **Card details never touch Payli**
Entered on the provider's own secure page. Payli never sees or stores the full card number or security code; 3-D Secure applies where the bank requires it.

ii. **Refunds come from your provider**
Your team starts a refund in the dashboard; the provider returns it to the guest's original card. Payli never funds or holds a refund.

iii. **Fees invoiced, never deducted**
Payli invoices its own fees separately and takes no fee on tips. Your provider's card fees follow your merchant agreement.

Honest about the beta: Payli is not a bank or a licensed payment company; the provider holds the licence. Payli hasn't yet been independently audited or certified, including against PCI DSS, and doesn't claim to be.

CHAPTER SEVEN — INTEGRATIONS

07

Works alongside the systems you already run, and we're clear about what's ready.

SYSTEM	STATUS	WHAT THE CONNECTOR DOES
AQUA POS	IN DEVELOPMENT	Built to import your menu and post every fully paid table back as a sale with items, tax, service and tip. Sale posting is being tested on AQUA's test server.
Foodics	IN DEVELOPMENT	Reads the live order on each table. Staff confirm the paid order in the Foodics cashier, using Foodics' own pay-at-table flow.
POSRocket	PLANNED	Planned together with Foodics, which acquired POSRocket.
Oracle MICROS Simphony	PLANNED	Designed to post each fully paid table as a check with its tender and tip.
A licensed payment provider in Jordan	IN TESTING	Guests pay on the provider's own hosted page: Visa and Mastercard, plus Apple Pay and Google Pay where the provider enables them. CliQ isn't supported.

POINT OF SALE
A POS Payli connects to, or one you'd like us to

PAYMENTS
A merchant account with a licensed provider

DEVICES
Any tablet, phone or laptop with a browser

TABLES
A printed QR code for each table

Status as of November 2026. In development: being built and tested against the vendor's test system; not yet live at any restaurant. Planned: not built yet.

CHAPTER EIGHT — GETTING STARTED

08

From a 15-minute demo to your first paid table.

01
See it on your phone
A 15-minute demo of the guest's side and yours, with your questions answered.

02
Check the fit
We confirm your POS, payment provider and what's ready for your venue today.

03
Set up your venue
We create your venue, connect your POS and bring in your menu and service charge.

04
A QR on every table
Add your tables in the dashboard and print a QR code for each one.

05
Brief the team
The floor board, receipts and refunds take minutes to learn. Then your first tables pay.

0	**0**	**Invoiced**	**Per venue**
Hardware to buy. Guests use their own phones; staff use a browser.	Payli fee on tips. The full tip goes to the restaurant.	Fees billed separately, never deducted from your payments.	No price list. Pricing depends on your venue; we walk you through it in the demo.

CHAPTER NINE — BEFORE YOU ASK

09

Questions restaurant owners ask, answered plainly.

Is Payli live yet?

Payli is in closed beta in Amman and talking to its first restaurants. No restaurant is live yet, and we say plainly what works today and what's coming.

Does Payli hold our money?

Never. A licensed payment provider processes each payment and settles it into your own merchant account. You're the merchant of record.

When do we receive our money?

Straight from your payment provider, on the schedule in your merchant agreement. Payli doesn't set or control that schedule.

Does Payli replace our POS?

No. The bill comes from your POS, and when the table is fully paid the sale is posted back to it.

Do guests need an app?

No. The QR opens the bill in the browser: no app, no account, no Wi-Fi password, and no name, email or phone number to pay.

Who handles refunds and chargebacks?

The restaurant, as the merchant of record. Your team starts a refund in the dashboard; your provider returns it to the guest's original card.

How are card details protected?

They're entered on the provider's secure page, so Payli never sees or stores the full card number or security code.

Does it work in Arabic?

The guest flow is in English and العربية, switched with one tap, with amounts in JOD to three decimals. The restaurant dashboard is in English today.

Bring Payli to your floor.

Book a 15-minute demo and see Payli on your own phone, with your own menu. We're choosing a small first group of restaurants in Amman.
