[SPECIFICATION SHEET]

The bill comes to the table. Nobody waits for it.

Payli is pay-at-table software for restaurants in Jordan. Guests scan the QR code on the table, see the itemised bill, split it, tip and pay from their own phone. The restaurant gets a live floor, an exact record, and the sale posted back to its POS.

[FIG. 02 · SYSTEM DIAGRAM]

Payli sits between your POS and your payment provider. It carries data, never money.

------ DATA PATH —— MONEY PATH (PROVIDER → YOU) PAYLI NEVER HOLDS, POOLS OR PAYS OUT FUNDS

NOTE 1 · BILL
Your POS gives Payli the menu and prices, so the bill on the phone matches the one your team rang up.

NOTE 2 · PAYMENT
Payli sends your provider only the amount to charge. Card details stay on the provider's page.

NOTE 3 · SALE
When the table is fully paid, the finished sale goes back into your POS with items, tax, service, tip and tender.

[TABLE 01 · FAILURE MODES OF THE LAST FIVE MINUTES]

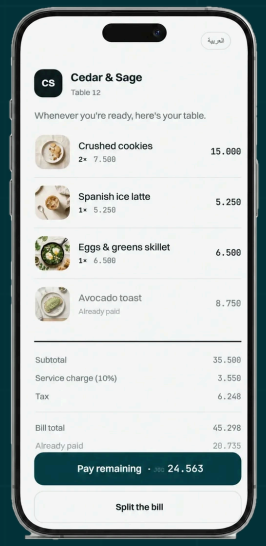

Where the end of a meal breaks, and what Payli changes.

The meal is over, but the table isn't free. Everyone waits on the same few steps: get the check, bring the machine, work out who owes what.

ID	WHO	FAILURE MODE	WITH PAYLI
FM-01	**Guests** Waiting to be allowed to leave	Catching a server's eye, waiting for the check, waiting for the card machine, then doing arithmetic at the table.	They pay from their own phone the moment they're ready, and split it fairly in a few taps.
FM-02	**Team** Busy hands at the busiest moment	Printing checks, walking terminals across the room and splitting bills by hand while new tables are waiting.	The floor board shows which tables are paying and paid, so staff stay on the floor.
FM-03	**Business** Tables held, slips to reconcile	Seats stay occupied after the meal ends, and the day closes with a pile of slips to match against the bank.	Every bill, split and tip is recorded to the fils and exports as one clean file.

[FIG. 03 · GUEST SEQUENCE · FOUR STEPS]

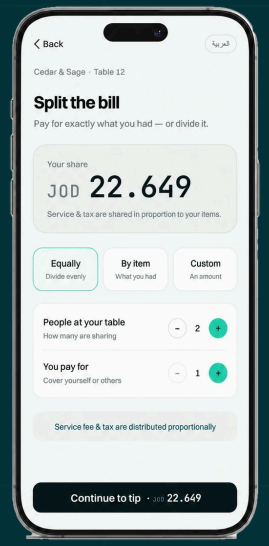

From "we're done" to paid, with no app to download.

STEP 01 · SCAN

The bill opens itself

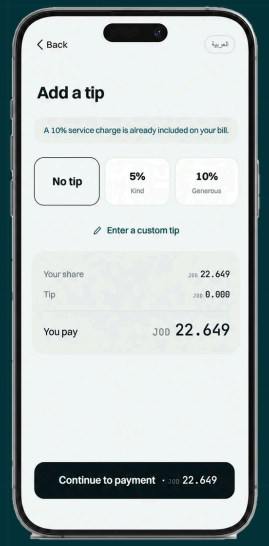

One QR per table opens the itemised bill in the browser, in English or Arabic.

STEP 02 · SPLIT

Evenly, by item or any amount

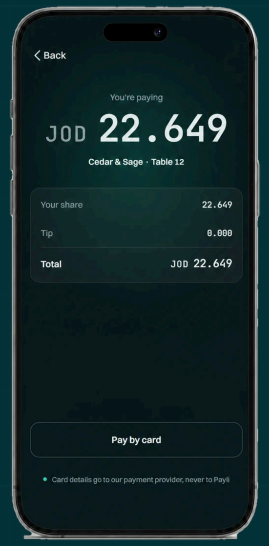

Service and tax follow the items. Nobody pays twice.

STEP 03 · TIP

A thank-you in one tap

5%, 10%, custom or none. Payli takes no fee on tips.

STEP 04 · PAY

On the provider's secure page

Visa or Mastercard, plus Apple Pay and Google Pay where enabled.

[TABLE 02 · RESTAURANT DASHBOARD MODULES]

One dashboard runs the floor, the payments and the close.

M-01 **Live floor**
Bill open, paying now, paid: readable from two metres, with QR codes for every table.

M-02 **Transactions**
Table, bill, tip, total, method and time. Receipts, refunds with a reason, CSV export.

M-03 **Reconciliation**
A double-entry, append-only ledger exact to the fils, ready to match your provider's settlement.

M-04 **Menu manager**
Imported from your POS where the integration supports it, with Arabic item names.

M-05 **POS sync**
The sync status of every paid bill, with a retry button.

M-06 **Ratings**
Every rating and comment, with its table and time.

[TABLE 03 · OUTCOMES AND THE MECHANISM BEHIND EACH]

Faster tables, freer staff, numbers that close.

ID	OUTCOME	MECHANISM
O-01	**Tables free up sooner** Guests pay the moment they're ready, instead of waiting for the check and the card machine.	QR → LIVE BILL → SPLIT → PAY
O-02	**Staff stay on the floor** No terminals walked across the room, no hand-split checks. The board shows who has paid.	M-01 LIVE FLOOR
O-03	**Splitting stops being a problem** Evenly, by item or a custom amount. Service and tax follow the items; nobody pays twice.	PROPORTIONAL SPLIT · FILS-EXACT
O-04	**Tips at the right moment** Asked while the service is fresh. The full tip goes to the restaurant.	PAYLI FEE ON TIPS = 0
O-05	**The day closes exact** Every bill, split, tip and refund, ready to match against your provider's settlement.	M-03 LEDGER · CSV
O-06	**No re-keying at the till** When the table is fully paid, the sale goes back to your POS with items, tax, service, tip and tender.	POS CONNECTOR · IN DEVELOPMENT
O-07	**You hear about every table** Ratings and comments arrive while the guest is still there to talk to.	M-06 RATINGS

[WORKSHEET W-01 · YOUR NUMBERS]

What are the last five minutes worth to your venue?

YOUR VENUE	EXAMPLE	YOURS
A · Tables	20	
B · Seatings per table on a busy night	2	
C · Minutes saved per seating Your estimate of the wait between "we're done" and "we've paid"	5 min	
D · Average seating length	75 min	
E · Average bill per table	JOD 35	
F · Busy nights per month	12	
Extra seatings per month A × B × C ÷ D × F	32	
Revenue capacity per month Extra seatings × E	JOD 1,120	

[OUTPUT · EXAMPLE]

TABLE TIME FREED / BUSY NIGHT

3.3 H

5 minutes × 2 seatings × 20 tables = 200 minutes

EXTRA SEATINGS / MONTH

32

200 ÷ 75 minutes × 12 busy nights

REVENUE CAPACITY / MONTH

JOD 1,120

32 seatings × JOD 35 average bill

An illustration built only from the numbers entered. It is capacity, not a forecast: it becomes revenue only on nights when guests are waiting for a table. Payli has no measured results from live restaurants yet.

[TABLE 04 · CONSTRAINTS ON MONEY]

Payli is software. It never holds your money.

Guests pay through a licensed payment provider, and the money settles directly into your own merchant account. You stay the merchant of record.

C-01

Card details never touch Payli

Entered on the provider's own secure page. Payli never sees or stores the full card number or security code; 3-D Secure applies where the bank requires it.

C-02

Refunds come from your provider

Your team starts a refund in the dashboard; the provider returns it to the guest's original card. Payli never funds or holds a refund.

C-03

Fees invoiced, never deducted

Payli invoices its own fees separately and takes no fee on tips. Your provider's card fees follow your merchant agreement.

Honest about the beta: Payli is not a bank or a licensed payment company; the provider holds the licence. Payli hasn't yet been independently audited or certified, including against PCI DSS, and doesn't claim to be.

[TABLE 05 · COMPATIBILITY MATRIX · AS OF 2026.11]

Works alongside your POS and payment provider, and we're clear about what's ready.

ID	SYSTEM	STATUS	CONNECTOR
I-01	**AQUA POS**	IN DEVELOPMENT	Imports your menu and posts every fully paid table back as a sale with items, tax, service and tip. Sale posting is being tested on AQUA's test server.
I-02	**Foodics**	IN DEVELOPMENT	Reads the live order on each table. Staff confirm the paid order in the Foodics cashier, using Foodics' own pay-at-table flow.
I-03	**POSRocket**	PLANNED	Planned together with Foodics, which acquired POSRocket.
I-04	**Oracle MICROS Simphony**	PLANNED	Designed to post each fully paid table as a check with its tender and tip.
P-01	**Licensed payment provider (Jordan)**	IN TESTING	Hosted secure page. Visa and Mastercard; Apple Pay and Google Pay where the provider enables them. CliQ not supported.

POINT OF SALE	PAYMENTS	DEVICES	TABLES
A POS Payli connects to, or one you'd like us to	A merchant account with a licensed provider	Any tablet, phone or laptop with a browser	A printed QR code for each table

IN DEVELOPMENT = BEING BUILT AND TESTED AGAINST THE VENDOR'S TEST SYSTEM; NOT YET LIVE AT ANY RESTAURANT. PLANNED = NOT BUILT YET.

[PROCEDURE P-01 · ONBOARDING]

From a 15-minute demo to your first paid table.

We're choosing a small first group of restaurants in Amman.

STEP 01

See it on your phone

A 15-minute demo of the guest's side and yours, with your questions answered.

STEP 02

Check the fit

We confirm your POS, payment provider and what's ready for your venue today.

STEP 03

Set up your venue

We create your venue, connect your POS and bring in your menu and service charge.

STEP 04

A QR on every table

Add your tables in the dashboard and print a QR code for each one.

STEP 05

Brief the team

The floor board, receipts and refunds take minutes to learn. Then your first tables pay.

0

Hardware to buy. Guests use their own phones; staff use a browser.

0

Payli fee on tips. The full tip goes to the restaurant.

Invoiced

Fees billed separately, never deducted from your payments.

Per venue

No price list. Pricing depends on your venue; we walk you through it in the demo.

PAYLI	ONBOARDING	2026.11	10

[APPENDIX A · QUESTIONS OWNERS ASK]

Answered plainly.

Is Payli live yet?

Payli is in closed beta in Amman and talking to its first restaurants. No restaurant is live yet, and we say plainly what works today and what's coming.

Does Payli hold our money?

Never. A licensed payment provider processes each payment and settles it into your own merchant account. You're the merchant of record.

When do we receive our money?

Straight from your payment provider, on the schedule in your merchant agreement. Payli doesn't set or control that schedule.

Does Payli replace our POS?

No. The bill comes from your POS, and when the table is fully paid the sale is posted back to it.

Do guests need an app?

No. The QR opens the bill in the browser: no app, no account, no Wi-Fi password, and no name, email or phone number to pay.

Who handles refunds and chargebacks?

The restaurant, as the merchant of record. Your team starts a refund in the dashboard; your provider returns it to the guest's original card.

How are card details protected?

They're entered on the provider's secure page, so Payli never sees or stores the full card number or security code.

Does it work in Arabic?

The guest flow is in English and العربية, switched with one tap, with amounts in JOD to three decimals. The restaurant dashboard is in English today.

[NEXT STEP]

Bring Payli to your floor.

Book a 15-minute demo and see Payli on your own phone, with your own menu. We're choosing a small first group of restaurants in Amman.

WEB payli.io	BASED IN Amman, Jordan

Payli is software for restaurants, built by a company registered in the Hashemite Kingdom of Jordan. It never holds or moves money: payments are processed by licensed payment providers and settle directly to each restaurant's own merchant account. Product screens use demo data; Cedar & Sage is a fictional venue. Statuses as of November 2026.
